

A question we are frequently asked is “what entrance doors do you do?”. The answer is that there is a near endless number of possibilities. Things to consider are: colour, design, style, size, functionality, accessibility, privacy and security.

Colours

Entrance doors are available in the base colours of white and cream plus all 45 laminate colours including single and double-sided options.

There are 47 PVC colour options and many glass options to choose from, including obscure and coloured.

NK Windows carries a number of entrance door colours in stock in Christchurch, all double-sided unless stated: White, Cream, Golden Oak, Anthracite Grey- out / White- in, Anthracite Grey, Red, Mountain Pine (aka Larch).

Colour codes for identification on NK Windows website and Aluplast colour swatch:

- Golden Oak: 23
- Anthracite Grey: 60
- Red: 32
- Mountain Pine: 55

All other 41 laminate colours are available ex-Germany. Some are available double-sided only. Please check with NK Windows.

Additionally, it is possible to use obscure and coloured glass for privacy and colour coordination / contrast.

Accessibility

There are a number of options when it comes to accessing and securing your entrance door:

- External key / Internal key – handles on both sides
- External key / Internal thumbwheel – handles on both sides
- No external key / Internal locking handle – no external handle (small pull grip only)
- External keypad access / Internal key or thumbwheel
- External wireless access including NFC, Bluetooth and fingerprint / Internal key or thumbwheel

Secure access via PIN code or fingerprint reader. This system also allows temporary access for tradespeople and other visitors.

Secure access via mobile app.

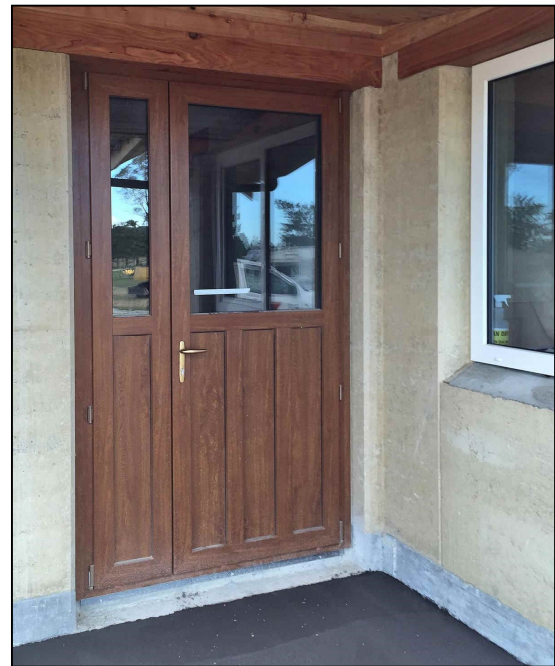

Handles

There is a range of entrance door handles available. The Rhapsody handle by Maco is the standard handle and is available in bronze, silver and white. The other handles shown below are from Windsor Brass, manufactured in Invercargill. They are available in a number of finishes including brushed nickel, satin chrome, powder coat and other finishes upon request.

Juno by Windsor	Spectra by Windsor

Functionality

- Main entrance doors usually open inwards, but can easily be setup to open outwards if required.
- The use of obscure glass allows light into your entrance way whilst maintaining privacy. Coloured glass can also be used. Cat doors and dog flaps can be installed as can peep holes and knockers.
- The use of 1.5 doors or French doors is a very popular way to maximize openings for moving furniture, etc. The smaller door is opened using a hidden lever.

Entrance door configured as a 1.5 door allows easy moving of furniture and other large items, etc.

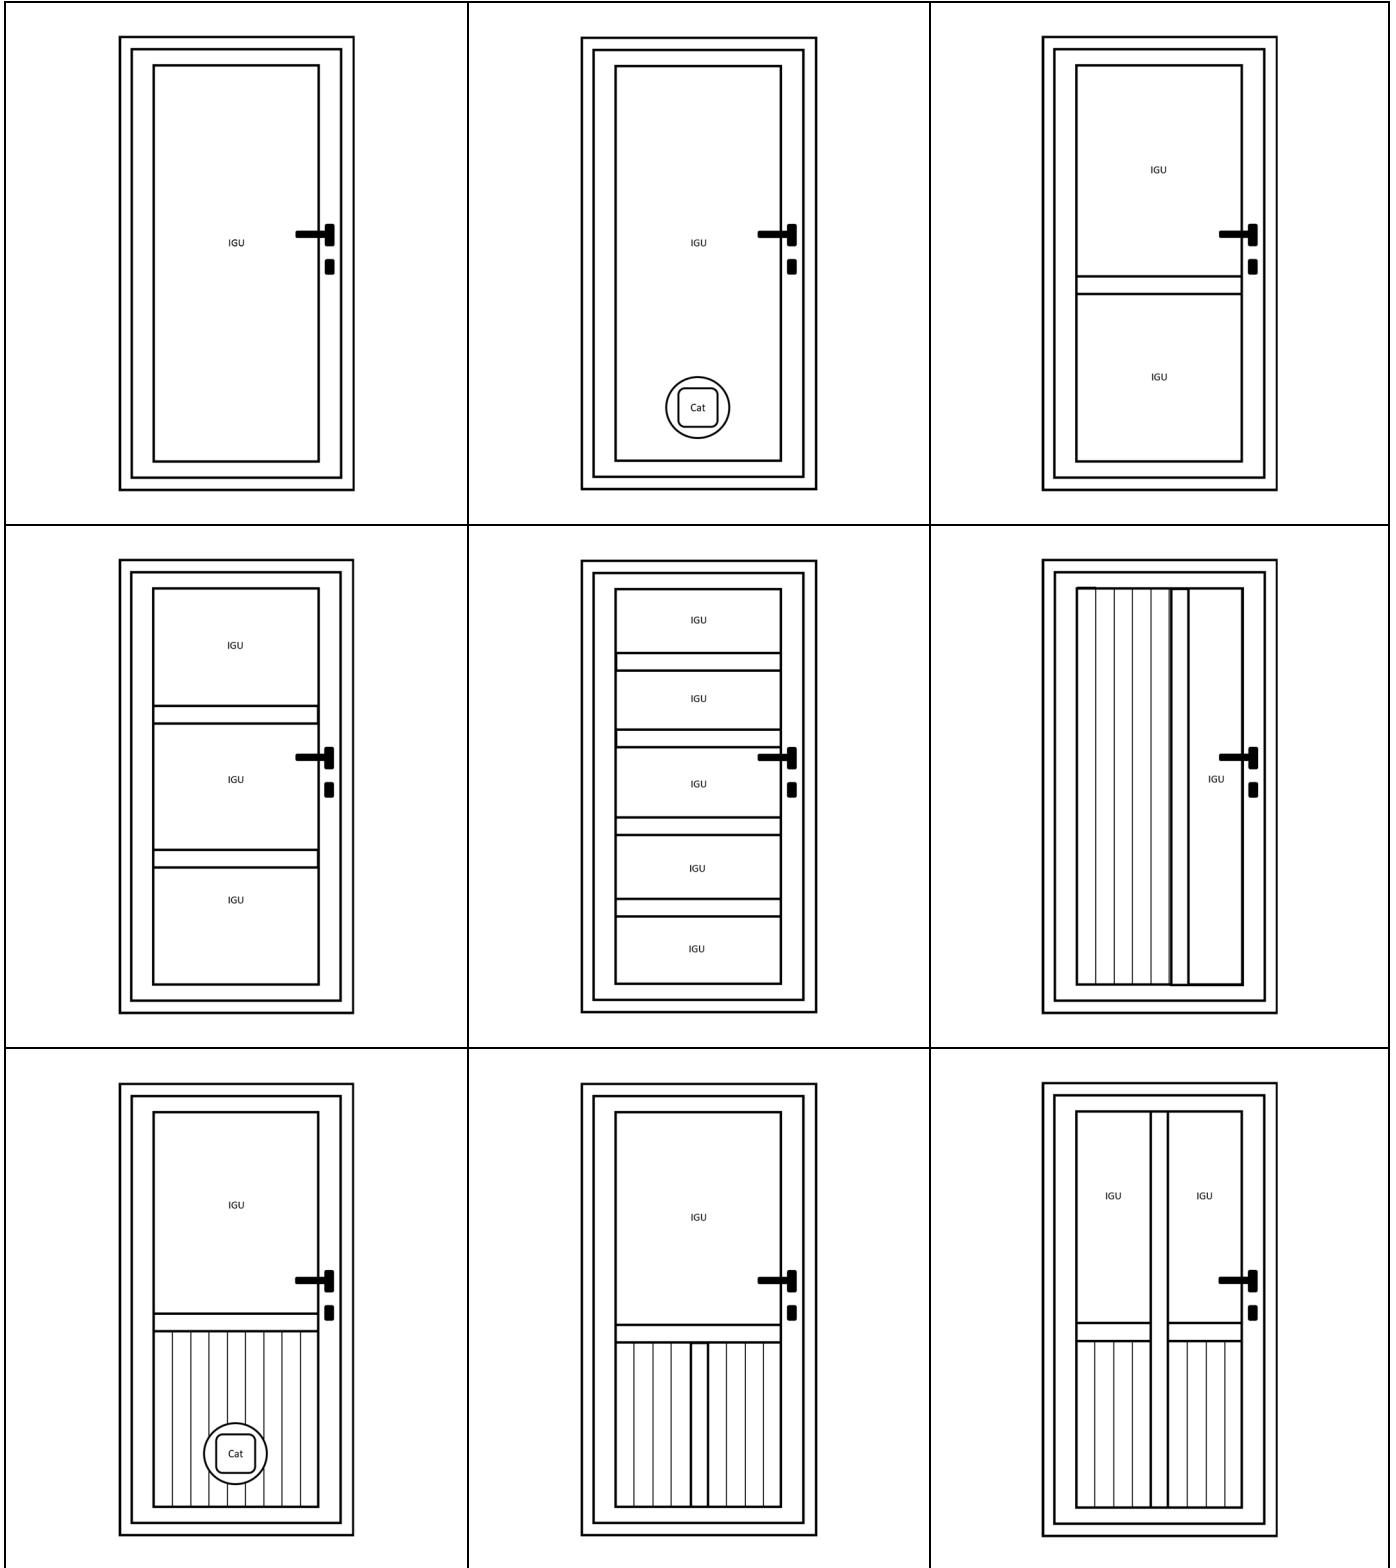

The line drawings on the following pages are intended to provide inspiration and are by no means the only options available. Entrance door designs are largely limited by imagination only.
